

INTRODUCING

stay ACTIVE

The New Way to Age in Place

“I worry about my Mom. I wish there was a way to know that she is safe 24/7, without intrusive cameras or embarrassing pendants.”

Now you can, with Stay Smart Care ACTIVE!

Recent advances in smart home technology offer the ability to passively monitor your loved one, 24/7. Medical response pendants are a thing of the past! Stay Smart Care’s innovative technology gives caregivers and aging adults the ability to **Stay** connected, giving the caregiver peace of mind their loved one will **Stay** safe, so aging adults can **Stay ACTIVE** and enjoy their independence in the comfort of home.

Finally, a solution that works for everyone!

Stay Smart Care ACTIVE utilizes cutting edge monitoring and fall detection technology. Small battery powered smart sensors, professionally installed throughout the home, monitor activity and detects falls. This proprietary system is connected to a medical command center staffed with an emergency response team. In addition, caregivers can check in on how their loved one is doing anytime by simply using the Stay Smart Care mobile app via a mobile phone or Alexa.

You: “Alexa, ask Stay Smart Care how mom is.”

Alexa: “Your mom woke up at 7:02 and was last in the kitchen at 8:45, her activity level was normal for the past 24 hrs.”
